Jesus Blanco, Senior Frontend Developer

Táchira, Venezuela, contact@jblanco.dev

PROFILE

I love crafting modern, scalable, and user-centered web applications. I'm passionate about building clean, efficient interfaces where design and data work seamlessly together and thrive in collaborative environments, bridging technical depth with product thinking to deliver reliable, high-impact solutions.

Driven by curiosity and continuous learning, I approach every project as a chance to refine my craft and push ideas into production.

EMPLOYMENT HISTORY

Mar 2025 — Present

Senior Frontend Developer, Freelancer

As a freelancer I have been putting into practice my technical and organizational skills with various clients. This role has allowed me to explore diverse technologies and workflows. I have contributed to project architecture, improved deployment pipelines, and collaborated across teams to deliver effective, production-ready solutions.

This experience has been both challenging and rewarding, consolidating and testing all that I've learned in 7 years of professional development.

Key Technologies: React, NextJS, TypeScript, Tailwind CSS, DaisyUI, MUI, Pocketbase, Graphql, Urql, Hasura, Codegen, Supabase.

May 2022 — Mar 2025

Senior Frontend Developer, Elion Partners

Engineered enterprise-grade React/TypeScript UI library powering data-intensive analytics platform for real estate market intelligence. Transformed raw market data into actionable insights through modern UI framework and application ecosystem.

- Built interactive map visualizations and heatmaps correlating market metrics.
- Collaborated with data scientists to implement predictive analytics modules into UI components.
- Built 5 interconnected web apps including predictive valuation models, portfolio dashboards, and demographic trend analyzers.
- Implemented company-wide design system (Storybook) ensuring consistent experience across internal products.
- Built reusable component architecture, reducing development time and enhancing maintainability.

Key Technologies: React, NextJS, TypeScript, Turbo, Storybook, Amcharts 5, Mapbox, Zod, Zustand, React Query, React Hook Form, React Table, Tailwind CSS.

Sep 2021 — May 2022

Mid Frontend Developer, White Peak Tech

Led full-stack modernization initiative migrating legacy Django/HTML system to Vue/Nuxt architecture, enhancing performance and enabling future scalability.

- Coordinated with backend team to design REST API adapters for seamless Django-to-Nuxt data

integration.

- Implemented Vuex state management patterns replacing legacy jQuery workflows.

Key Technologies: Vue , Nuxt.js (SSR), Vuetify, Django Templates, jQuery, Bootstrap, Axios API Layer.

Aug 2020 — Sep 2021

Junior Frontend Developer, Legal Credit Solutions

Co-architected enterprise-grade Vue UI library powering client applications and internal analytics suites for financial credit fintech.

- Built Nuxt.js frontend architecture for internal dashboards.
- Collaborate in the Storybook documentation to achieve good practices in maintainability and future features.

Key Technologies: Vue, Nuxt, REST APIs, Storybook, Tailwind CSS.

Nov 2018 — Jun 2020	**Junior Frontend Developer, White Peak Tech**

Designed and implemented investment platform UI for art/real estate markets, with parallel dashboard development for analytics clients.

- Implemented Materialize CSS framework for core investment platform.
- Developed 4+ investor dashboards using Vue/Nuxt.js stack with real-time data visualization features.

Key Technologies: HTML5, CSS3, JavaScript (ES6+), Materialize CSS, Bootstrap, Vue, Nuxt, Responsive Design.

Aug 2019 — Oct 2019	**Web Developer, Inveca de Venezuela S.A**

Designed and implemented a modernized WordPress solution for a glass manufacturing client, revitalizing their digital presence by migrating legacy assets and aligning web design with brand identity.

- Hosting restoration to preserve historical data.
- Developed custom WordPress theme with brand-centric color schemes, optimizing visual consistency with company logo and corporate vision.
- Executed full website migration including content restructuring.

Key Technologies: WordPress Development, Web Hosting Migration, PHP Customization, Brand Identity Integration.

Aug 2018 — Sep 2018	**Web Developer, Motores y Partes Diesel JU**

- Use of responsive WordPress theme by translating brand guidelines (color palette/logo) into

functional UI/UX design.

- Hosting environment setup with domain configuration and email.
- Implemented PHP-based customization.

Key Technologies: WordPress Theme Customization, Brand Implementation.

E D U C A T I O N

May 2015 — Oct 2018	Computer Engineering, Universidad Experimental Nacional Del Tachira
	San Cristobal

L A N G U A G E S

English (Highly Proficient)	Spanish (Native Speaker)

H O B B I E S

I love experimenting with technology in all forms

3D printing, electronics, home automation, and PC building. Always exploring how technology can be built, improved, and connected.
